NEVER EVER let yourself become dehydrated. Drink plenty of water throughout the day and NEVER EVER totally eliminate

your carbohydrate intake. From my experience most people who have lost weight too fast by eliminating their carbohydrates ended up with a lot of excess skin afterwards. The whole idea is to lose the weight to get healthier and of course to look better with your clothes ON and with your clothes OFF. Here are some tips The natural growth hormones that the body needs to develop are produced in large quantities during sleep. This has often been seen as the explanation for why people who dont sleep too much often end up being slightly shorter than their peers. These hormones are produced at their peak during puberty and tend to cease production afterwards. People are still unsure why the body produces more of it during sleep.

There are some that theorize that this is merely a part of the side effects of sleep, of sorts, arguing that the body is too busy coordinating itself to really produce growth hormones. However, this assumption is rather arguable because the body is still coordinating the same systems during sleeping hours as it is during the waking hours.
